

Data submission

To submit your data to CIRAD for their integration into the Eurigen database you'll need to fill several template files. These files are in the Microsoft Excel format but you can edit them with the free software OpenOffice calc.

See in the above table, the templates required for different study types.

TEMPLATE	STUDY	Association	Genotyping	Phenotyping
association_study.xls		X		
genotyping_study.xls			X	
germplasm.xls			X	X
marker_rflp.xls		X	X	
probe.xls				
marker_snp.xls *		X	X	
marker_ssr.xls *		X	X	
primerpair.xls				
phenotype_study.xls				X
trait.xls		X		X
Reference.xls **		X	X	X

* According to the type of markers involved in the study

** Only if your data has been published

Each template has several tabs depending of the data except for a study tab which is always present. Each tab is mandatory. For each tab the mandatory columns are indicated.
